TO: Minerals File

FROM: Anthony A. Gallegos, Senior Reclamation Specialist

RE: Site Inspection, Natural Resource Holding Company, Sam 75 Mine, S/019/048, Grand County, Utah

Date of Inspection: October 19, 1999

Time of Inspection: 1725 - 1740

Conditions: Cool, partly cloudy

Participants: Tony Gallegos, Doug Jensen, DOGM

Purpose of Inspection: To examine the site while in the area

**Note: The initial small mine notice for this site was found as deficient by the Division. A deficiency letter was sent out; however, a written response has not been received and reviewed by the Division at the time of this inspection.**

This inspection was limited to the proposed mine site. At the proposed mine site there were no signs of recent disturbance. There were some old trenching disturbances in the area. There were several cedar posts at the site marked with flagging. Photographs were taken of the project area using the cedar posts as alignments. A GPS unit was used to locate a point near the first cedar post with flagging we encountered. There were signs of recent vehicle traffic in the area. However, there were no signs of any mining activity at this time.
